- Feedback
- Coaching

## What is Ergo's take on Project Leadership?

Projects are central to nearly every business or organisation. Successful leadership and management of a project can significantly contribute to the overall success of that organisation. Leadership of a project is more of an art than a science. This course will move beyond teaching theoretical concepts and will provide a canvas for immediate application within current projects. The emphasis will be on developing effective skills as a Project Leader; leading people rather than simply managing resources. Therefore in addition to investigating the various phases of a project lifecycle, attention will also be given to effective communication and team motivation to achieve excellence in project outcomes.

## Ergo's methodology—Practice not Theory

Ergo's Project Leadership course offers the element of customisation. The course provides the opportunity for participants to bring an active project to the course, ensuring that all topics are applicable to the individual, this is a unique element in the market and ensures that participants own their learning.

The workshop format leverages the opportunity for a cross-pollination of ideas and Ergo facilitates an outcome that ensures participants glean from the experience of others.

### What does it involve?

- Reading material, emailed prior to the course
- 3x 1 day workshops
- Opportunity to bring an active project
- Optional post course individual interviews, 30 minutes

## Ask Yourself:

What gets in the way of key projects being delivered in my organisation?

What is the profile of the people most likely leading projects?

How am I equipping them for effectiveness?
